E2 | 12 selected trials

Frozen main table · 4 variants × prescribed seeds 1, 2, 3 · 25-epoch trailing averages

Training loss

Revenue during training

A A-wide B C Seed 1 Seed 2 Seed 3

Dots mark selected checkpoints; complete 1,500-epoch histories are retained.

Loss = 10 × positive training regret + max(0, target − revenue). Targets differ across selected trials.
